

Acquire the knowledge to  
create a sustainable future.  
The reasons why  
are all around you.

With the **NEW Bachelor of Environmental Studies** program at the University of Prince Edward Island you will learn to make environmental connections across academic fields and to analyze environmental challenges we face today. In the classroom, field, and community, you will lead the way in finding innovative solutions—making a positive impact toward sustainability in your personal life, locally and globally.

UNIVERSITY  
of Prince Edward  
ISLAND

**NEW**

# BACHELOR OF ENVIRONMENTAL STUDIES

## KEY PROGRAM FEATURES

- › **Interdisciplinary**—integrates courses and knowledge across the sciences, social sciences, humanities, and business
- › **Internship**—includes a 30-hour internship with a community partner
- › **Three specializations to choose from:**
  - › **Environmental Innovation and Change Management**  
Learn how to live within the limits of our environment and develop innovations that have a positive impact; to challenge the conventional and move organizations, businesses, and communities to invoke positive change.
  - › **Island Environments and Sustainability**  
Studying the diverse characteristics of islands and islanders' interaction with the environment in order to gain an understanding of lessons for sustainability in all places.
  - › **Environmental Thought and Practice**  
Exploring the values, attitudes, and beliefs of people in relation to the environment in order to provide answers to pressing environmental concerns.

## What can I BE READY for?

Graduates with a **Bachelor of Environmental Studies** can have exciting careers as:

SUSTAINABILITY OFFICER  
ENVIRONMENTAL MANAGER  
SUSTAINABILITY POLICY ANALYST  
ENVIRONMENTAL EDUCATOR  
ECOTOURISM OFFICER
