

Study Tips

Read course syllabus carefully

Highlight and add the important dates in the course to a term planner so you don't forget them.

Set up the best environment that can help you focus while studying

Choose a comfortable place and study during the times of the day when you're most productive.

Use some learning strategies

Spaced practice, retrieval practice, rehearsing the material and other strategies can assist your learning.

Check out the resources that UPEI offers

You can find many services offered online for additional help throughout your online courses.

Always create a daily to-do list

Set SMART goals for the day and try to achieve them.

Use programs that help you study

However, when you're studying make sure to put the phone and any other distractions away.

Do not procrastinate

Procrastination is when you keep delaying working on a task until there isn't enough time to get the work done efficiently. Don't start working late on your assignments and stay on top of your classes.

Ask your professors for help when you need it

Don't be afraid to reach out to your professors for any problems you face in your courses. Keep asking until you understand the material well and you're ready to take the exam.

Find external resources

If you have trouble understanding a topic, just search online and you can find many resources.
