

### Animal Care Committee Animal Utilization Protocol Research Form

For Office Use Only	Revised Form -: YVfi Ufm% 28\$%
Date Received:	
Protocol #:	
File #:	

### ⇒bglfi Wi]cbg:

- Hand written protocols will not be accepted for review.
- Protocols are due the 1<sup>st</sup> Friday of every month.
- When submitting a protocol with Proprietary Compounds, state in the e-mail subject line: Proprietary Compounds.
- Both the signed hardcopy and electronic protocol submission must be submitted by the deadline date.
- Submit one copy of original protocol to ACC Admin. in the Dept. of Biomedical Sciences, AVC.
- Submit an electronic copy to animalcare@upei.ca.
- Retain a copy for your files.

Note: Pilot Studies are only valid for one year, with no renewal.

Section 1 - Project Title, Proposed Start Date, Expected Project Completion Date					
Title:					
Proposed Start Date of Research:					
Expected Project Completion Date:					
Section 2 - Principal Investigator					
Name:	Dept.:				
E-mail:					
Work Phone:	Home Phone:				
*List Date & Place of Completion of Most Recent Animal Us	ser Training:				
Section 3 - Category of Invasiveness					
From Section 15 - Procedures (Place an "X" in the box corresponding to the Highest Level Procedure.)	A B C D E				

Section 4 - Project Personnel			
Designated Emergency Contact(s)	Department	Home # / Work #	*List Date & Place of Completion of Most Recent Animal User Training.
Associate(s)	Department	Work #	*List Date & Place of Completion of Most Recent Animal User Training.
Technical Staff	Department	Work#	*List Date & Place of Completion of Most Recent Animal User Training.
			Most Recent Annual Oser Training.
Research Assistant(s) or Student(s)	Department	Work #	*List Date & Place of Completion of Most Recent Animal User Training.

**NOTE:** The Animal User Training Course is mandatory for faculty, graduate students, research technicians / technologists, research assistants / associates, postdoctoral fellows and undergraduate students. Only AVC DVM students while in the DVM program are exempt from taking the AUT Course. \*Training must be updated every 5 years.

Section 5 - Researce	ch Project G	eneral Infor	mation					
A) Does this application	on replace an e	existing protoc	ol? (Place a	ın "X" in a box)				
Yes - List Pı	rotocol #:			File #:				
No								
B) Length of Experime	nt: (Place an "	X" in a box)						
animal upon rec performed, i.e. a	eipt or after a brie naesthetized witho	f housing period d ut recovery, euthar	uring which time	d by euthanasia or return of the no manipulations other that ollection, etc.	n standar	d manager	ment proce	edures are
	recovery surgery.		<b>,</b>	, <u>.</u>	· · · · ·	.,		,
Section 6 - Funding	g							
A) Funding source will	be coming fro	om: (Place an '	'X" in all bo	es that apply)				
CIHR	ISERC	SSHRC	OTHER (specify					
B) Approved grant nur	nber(s) & title(	s):						
C) If funds are pending	g provide subn	nission date:						
Expected approval	date:					_		
D) Are all procedures i	n this protoco	l identical to tl	hose in the g	rant / contract?		Yes		No
lf "no", explain any	discrepancies	i.				_		•
E) Is this a research pr	oject involving	g external part	ners? (Plac	e an "X" in Box)				
	• •		•	e the required documer	nt(s).			
	ent(s) must be	completed be	tore beginni	ng work on project.				
No								
Section 7 - Scientif	ic Merit							
Place an "X" in a box:				<u></u>				
A) Do you have any concerns about the ACC seeking external peer review? (Refer to SMR Process & Procedures Section 4 for exemption http://files.upei.ca/research/processes_procedures_evaluation.pdf)								
· If yes, please explain.								

### **Section 8 - CCAC Reporting Data**

For CCAC reporting purposes, please write a summary description of your project (40 words or less), in terms understandable to a non-scientist. Example: Sampling blood from fish exposed to Virus X.

# **Section 9 - Purpose of Animal Use Category**

# Place an "X" in a box: 0 - Animals held in breeding colonies that have not been assigned to a particular research, teaching or testing protocol. 1 - Studies of a fundamental nature in sciences related to essential structure and function. 2 - Studies for medical purposes, including veterinary medicine, that relate to human or animal diseases or disorders. 3 - Studies of regulatory testing of products for the protection of humans, animals or the environment. 4 - Studies for the development of products or appliances for human or veterinary medicine.

Section 10 - Lay Summary (Must be understandable to Non-Scientists)
Provide an abstract of 250 words or less in simple language (Grade 8 reading level and understood by someone not familiar with scientific research) outlining the primary objective(s) and the benefits expected from the study.
Section 11 - Scientific Objectives and Research Plan
Section 11 - Scientific Objectives and Research Plan  A) Outline the overall hypothesis, rationale, and objectives for this study – (250 words maximum):

B) Outline the experimental design in enough detail to justify animal numbers requested for the entire project, (eg. Control and experimental groups, animals per group), etc.				
	_			

# Section 12 - Animals to be used

A) List all animals involved in the study.

Species	Strain	Type of Research (Lab /Field)	Total Requirement for Year 1	Housing (Bldg & Rm)	Experimental (Bldg & Rm)

B) For each species listed above indicate the Source / Supplier and Ownership.

Place an "X" in a box:		
C) Does the project involve the use of client-owned animals?	Yes	No
If "yes" did you attach a copy of the "Client Consent Form"? (See Appendix A)	Yes	No
D) If you are collaborating with another institution will any of the animal use be taking place outside of the University of Prince Edward Island?	Yes	No

If yes, please explain. (Please provide other institution's ACC contact information)

Section 13 - Trapping Wildlife					
Does this section apply to your protocol? (Place an "X" in a box)	Yes	No			
If you checked "yes" fill out the rest of this section, if you checked "no" you may omit this section.  Name of license holder:					
Permit / License #: Expiration Da	te:				
Attach copies of all permits. Copies of all permits must be provided to the	ne ACC once obtaine	ed.			
Specify: Method of capture (if a trap is used, indicate type of trap, its injury po	tential and monitoring	frequency).			
Transportation and / or housing of animals in the field:					
Capture of non-target species:					
Potential injuries or mortality during capture:					
Potential ecological disruption (type and degree of disruption anticipated	1):				
Disposal of animals (e.g. euthanasia, release to field):					

Section 14 - Reduction, Refinement, and Replacement
In accordance with the Canadian Council on Animal Care's request for compliance with the principles of "Reduction, Refinement, and Replacement":
A) Explain steps taken to minimize the number of animals used:
B) What consideration has been given to the use of alternative methods which do not involve live animals, for example tissue culture?

C) What was the rationale in selecting the animal species/strain for this research purp	ose?		
D) Have you consulted the 3 R's microsite at <a href="www.ccac.ca">www.ccac.ca</a> ? (Place an "X" in a box)		Yes	No
		Ĺ	

### **Section 15 - Procedures**

Review categories of invasiveness in animal experiments https://www.ccac.ca/Documents/Standards/Policies/Categories\_of\_invasiveness.pdf

A) For either groups of animals or individual animals, list all procedures and indicate what measures will be taken to alleviate or minimize pain and/or distress to the animal.

Include conditioning programs, screening for behavioural soundness, pre-operative assessment, post-operative care, specify analgesics & anaesthetics with dosages and routes of administration, and special procedures used; attach SOPs if available. Include euthanasia protocol if part of the usual procedures.

Species / Number of Animals	Procedures	Frequency / Duration	Analgesic / Anaesthetic (If none, please explain)	Dosage	Category of Invasiveness (A - E)

B) Specify the	criteria that will be used to asse	ss the level of a	ınalgesia / anaesthesia req	uired.	
C) If there are multiple procedures, give a sequential description of the use of animals in this research project.					

Section	16	Anima	I Caro
Section	- מו	· Anıma	ai Gare

A) List all the individuals who will carry out the above procedures. Provide their technical qualifications and relevant experience in performing these procedures.

Name	Procedure(s) to be Performed	Qualifications / Experience with These Procedures

B) Explain refinements that have been made to minimize pain, distress and/or discomfort to the animals. Refer to the above listed procedures. (i.e. modified procedures)

# Section 17 - Endpoints

A)	Indicate any clinical conditions or abnormalities which may occur.  (eg. Behavioural changes such as increased or decreased grooming, vocalizations or postural changes, or physical abnormalities such as anorexia, dehydration, diarrhea, etc.)
B)	Specify what health performance parameter(s) or other criteria triggers the decision for termination of the experiment or the animal. List the people who are responsible for these decisions.  (eg. Weight loss. Refer to CCAC guidelines on "Choosing an appropriate endpoint in experiments using animal for research, teaching and testing" at <a href="https://www.ccac.ca">www.ccac.ca</a> .)
C)	The interval(s) of monitoring of animals are to be clearly described and specific details must be provided where possible.

Section	18 - Euthanasia	/ Disposition

A) Specify the method of euthanasia and dosage:
B) Provide justification for use of any physical method of euthanasia (e.g. cervical dislocation, decapitation, etc.) without prior use of anaesthetic:
C) Final disposition of animals if not euthanized:

# A) Biohazardous Materials: (Place an "X" in any of the boxes that are used in this project) **Bacteria** Mycoplasma Virus **Parasite** Fungi Algae Unfixed animal blood, tissue, cells, body fluids Unfixed human blood, tissue, cells, body fluids Cell culture Non-indigenous life form (not found in PEI) Procedures involving large scale production of micro-organisms (>10 L) Genetically modified micro-organisms, animals, or plants **Biological toxin** Are any of the above applicable? (Place an "X" in a box) Yes No If you checked "yes" fill out the rest of this section, if you checked "no" you may proceed to 19 B). If any of the above are applicable to your project, you must obtain a biosafety permit as outlined in the University's Biosafety in Research and Teaching Policy before beginning work on your project. Exceptions might exist in some cases. These must be determined by the Biosafety Committee. Research carried out without obtaining a Biosafety Permit when necessary, will be treated as failure to comply with University policy and will result in a review by the Biosafety Committee and may lead to disciplinary action. Contact the Biosafety Officer if you have any questions. If your project includes an animal population infected with a pathogen transmissible to humans or other animals, this must be noted in the biohazardous materials inventory (in addition to all biohazardous substances under your control). Are you a registered user of this inventory? (Place an "X" in a box) No Yes If you need assistance in accessing this inventory, please contact the Biosafety Officer. Has a Biosafety Permit Application been submitted? (Place an "X" in a box) Yes No Has a Biosafety Committee Approval been obtained? (Place an "X" in a box) No Yes Biosafety Permit Number for this project, if available: B) Are hazardous agents listed below used in this project? No Is this applicable: (Place an "X" in a box) If you checked "yes" fill out the rest of this section if you checked "no" you may omit this section.

Section 19 - Hazardous Agents

Type:	Specify Agent:				
Radio-Isotope					
Carcinogen					
Chemical					
Other (e.g. electroshock)					
Specify what special animal o	care is required because of the hazard(s) involved:				
Section 20 - Emergency	Veterinary Care				
	th emergency, if contact cannot be made with the p	personnel	listed in \$	Section 2	and 4,
In the event of an animal heal the decision of the University	th emergency, if contact cannot be made with the p	personnel	listed in \$	Section 2	and 4,
In the event of an animal heal the decision of the University Do any restrictions to normal (Place an "X" in a box)	th emergency, if contact cannot be made with the p Veterinarian will be <u>final</u> .	personnel		Section 2	1
In the event of an animal heal the decision of the University Do any restrictions to normal (Place an "X" in a box)	th emergency, if contact cannot be made with the position veterinarian will be final.  veterinary care procedures apply to this project?	personnel		Section 2	1
In the event of an animal heal the decision of the University Do any restrictions to normal (Place an "X" in a box)	th emergency, if contact cannot be made with the position veterinarian will be final.  veterinary care procedures apply to this project?	personnel		Section 2	1
In the event of an animal heal the decision of the University Do any restrictions to normal (Place an "X" in a box)	th emergency, if contact cannot be made with the position veterinarian will be final.  veterinary care procedures apply to this project?	personnel		Section 2	1
In the event of an animal heal the decision of the University Do any restrictions to normal (Place an "X" in a box)	th emergency, if contact cannot be made with the position veterinarian will be final.  veterinary care procedures apply to this project?	personnel		Section 2	1

# Section 21 - Signatures

Following approval, a protocol number and file number will be assigned. These numbers must be used when ordering animals and it is understood that these animals will be used only as described in this protocol.

- This animal utilization protocol is **VALID FOR 12 MONTHS** from the date of commencement.
- Multi-year animal utilization protocols can be renewed for a MAXIMUM OF 4 YEARS IN TOTAL.

This animal utilization protocol accurately describes all the proposed animal use. It will be kept current and will be modified only after obtaining the approval of the Animal Care Committee.

All procedures will be carried out by the personnel listed in Section #16 who are trained and competent in using approved techniques and standard operating procedures.

The University Veterinarian will be notified within 24 hours of any unexpected problems or complications involving animal health

and wellbeing in this study.			
I certify the information provided is accurate and complete:			
Principal Investigator:	Date:		
Department Chair:	Date:		
Section 22 - Approval			
<b>CERTIFICATION STATEMENT:</b> The Animal Care Committee, having examined the proposal for the above project on matters relating to animal care and use, approves the experimental procedures proposed and certifies with the applicant that the care and treatment of animals used will be consistent with the University policy and will be in accordance with the principles outlined in the "Guide to the Care and Use of Experimental Animals" prepared by the Canadian Council on Animal Care. The Animal Care Committee also recognizes and respects the right of the investigator to privacy and confidentiality concerning the information presented in this protocol.			
Chairperson, UPEI ACC:	Date:
